

Fibers Rack Mount FHD High-Density Slide-out Fiber Enclosure

FHD-1UFCE

FHD 1U rack mount slide-out fiber enclosure, which is designed to accept up to 4 FHD series MTP modular cassettes or fiber adapter panels within a 1U space. It is able to serve as a transition from backbone cabling to distribution switching, an interconnect to active equipment, or as a cross-connect or interconnect in a main or horizontal distribution area.

FHD High-Density Series is a versatile solution in multiple sizes (1U/2U/4U) and styles for building backbones, data centers, and enterprise applications.

High Performance	Robust Construction	Installation and Application
Up to 96 fibers in 1U space	Made of SPCC steel, solid and durable	Distance between the cabinet door should be more than 3.47-inches
Compliant with RoHS	See-through acrylic window for maximum visibility	Hold up to 4pcs FHD series cassettes or FAPs
Compliant with TIA/EIA-568-C.3	Parallel sliding drawer for easy cable management	Mount to standard EIA 19" rack rail

FHD-2UFCE

FHD 2U rack mount slide-out fiber enclosure, which can house 8pcs FHD series MTP modular cassettes or fiber adapter panels. It provides a high-density flexible system to maximize rack space utilization and minimize floor space.

FHD High-Density Series is a versatile solution in multiple sizes (1U/2U/4U) and styles for building backbones, data centers, and enterprise applications.

FHD-2UFCE CONTINUED

High Performance	Robust Construction	Installation and Application
Up to 192 fibers in 2U space	Made of SPCC steel, solid and durable	Distance between the cabinet door should be more than 3.46-inches
Compliant with TIA/EIA-568-C.3	See-through acrylic window for maximum visibility	Hold up to 8pcs FHD series cassettes or FAPs
Compliant with RoHS	Parallel sliding drawer for easy cable management	Mount to standard EIA 19" rack rail

FHD-4UFCE

FHD 4U rack mount slide-out fiber enclosure, which can house 12pcs FHD series MTP modular cassettes or fiber adapter panels. It is ideal for fast, flexible, and reliable patch field solutions within main, horizontal, and equipment distribution areas (MDA, HDA, and EDA).

FHD High-Density Series is a versatile solution in multiple sizes (1U/2U/4U) and styles for building backbones, data centers, and enterprise applications.

High Performance	Robust Construction	Installation and Application
Up to 288 fibers in 4U space	Made of SPCC steel, solid and durable	Distance between the cabinet door should be more than 4.88-inch
Compliant with TIA/EIA-568-C.3	See-through acrylic window for maximum visibility	Hold up to 12pcs FHD series cassettes or FAPs
Compliant with RoHS	Sliding drawer and bend radius post	Mount to standard EIA 19" rack rail
	Bend radius posts help cable management
